Overview

The Arduino Sensor Kit is a joint electronics starter kit from Seeed and Arduino. It integrates 10 commonly used electronics modules on one PCB, so no breadboard, no soldering, and even no wiring are required. The Arduino content team has also prepared a step-by-step tutorial for this kit. All these features make it an ideal Arduino starter kit for Steam education and online teaching.

Key Features

01 **Co-produced by Arduino and Seeed**

02 **Plug & play addition to the Arduino Uno**

03 **10 most commonly used electronics modules**

04 **All modules are pre-wired on the PCB, no wiring required**

05 **High-quality online lessons provided by Arduino**

06 **Perfect for Steam Education and Online Education**
