Overview

This precision mini lathe is powered by a 400W motor with infinitely variable spindle speed from 0 to 2500 RPM, and features a four-position rotating turret for turning, threading, and taper operations. It is designed for high-accuracy non-ferrous metalworking, suitable for mini precision parts processing, sample making, and modeling.

Key Features

Description

If you would like to purchase or obtain more information about this item, please email us at: Manufacturing@chaihuo.org

-

• Mini Metal (Non-ferrous) lathe power of motor: 400W; Spindle speed 0-2500RPM Infinitely variable. Metal lathe machine using four-way rotating turret, which can be four common turning. Multi-function and multi stage, can be turned within foreign aid, turning thread, turning taper and so on.

• This precision mini lathe is designed to perform various types of metal turning. This machine can be used in areas such as mini precision parts processing, sample processing and modeling works

Standard Features:

- Safety switch
- Variable speed control
- Four position turret post
- Complete set of change gear
- High accuracy
- Clear guard on spindle
