INDUSTRIAL PRODUCT DATASHEET

Circuit marker set

Draw functional circuits on paper with the AgIC Circuit Marker conductive ink pen.

SKU	UPDATED	PRICE
110990435	2024-08-09 02:28:51	$14.90(Excl. VAT)

Overview

The AgIC Circuit Marker is a conductive ink pen for drawing electronic circuits on gloss photo paper. It enables rapid, solder-free prototyping of paper circuits to power LEDs and motors.

Key Features

introduction:

- AgIC Circuit Markers are conductive markers with which you can draw electronic circuits
- Draw your design of circuits on the paper with conductive ink pen, and run LEDs and motors
- Imagine and realize you imagination by embedding your paper circuits
- Smooth and fast prototyping tool for electric circuits
- Control current intuitively

Features:

Package List:

- One AgIC Circuit Marker.
- LEDs, batteries or paper are NOT included.

Specification:

Usable printing paper

l The marker does not perform conductivity on normal printing paper and can only be used on gloss photo paper. Please refer **http://agic.cc/usable-printing-papers/**

Caution

- Harmful or fatal if swallowed
- Major ingredients are water, sliver, and ethylene glycol
- Children under 12 years old must use the product under an adult’s supervision
- Do not eat the product

-
- Do not touch the ink with mouth or wound
-
- Ink adhered to skin must be washed down with water
-
- Please use the product within appximately six months
-
- Be careful of exothermic reaction when the current is above 100mA
-
- Do not decompose the product

When preserving the ink, make sure that the lid is closed and store it in a cool and dark place

If you have any question, please feel free to reach out! Hello {at} agic {dot} cc
