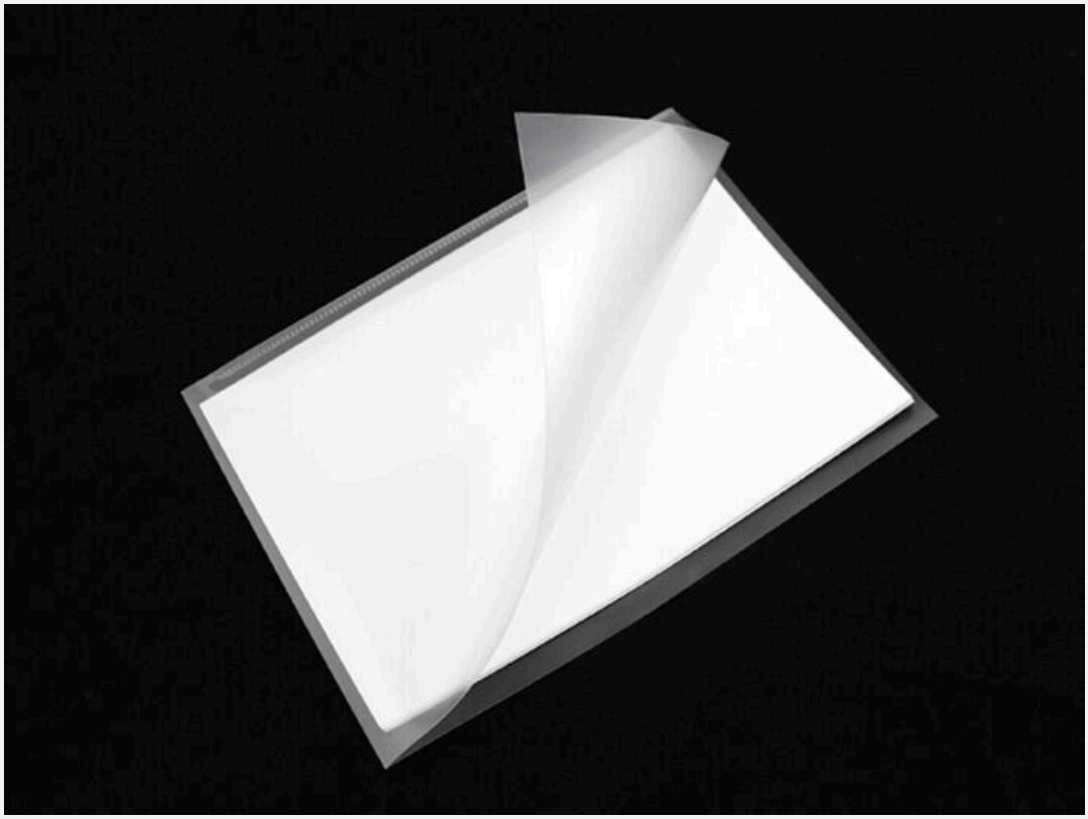
Overview



Agic Special Paper (A5) is a pack of 10 glossy photo paper sheets designed for use with the AgIC Circuit Marker conductive ink pen. It enables intuitive and rapid prototyping of electronic circuits directly on paper, powering LEDs and motors without traditional wires.

Key Features

introduction:

- Special paper for AgIC Circuit Marker, which is a conductive marker with which you can draw electronic circuits.
- Draw your design of circuits on the paper with conductive ink pen, and run LEDs and motors.
- Imagine and realize you imagination by embedding your paper circuits.
- Smooth and fast prototyping tool for electric circuits.
- Control current intuitively.

Features:

- 10 sheets of A5-sized paper;
- AgIC Circuit Marker, LEDs or batteries are NOT included.

Specification:

Usable printing paper

- The marker does not perform conductivity on normal printing paper and can only be used on gloss photo paper. Please refer **http://agic.cc/usable-printing-papers/**

Caution

- Harmful or fatal if swallowed
- Major ingredients are water, sliver, and ethylene glycol
- Children under 12 years old must use the product under an adult's supervision
- Do not eat the product
- Do not touch the ink with mouth or wound
- Ink adhered to skin must be washed down with water
- Please use the product within appximately six months
- Be careful of exothermic reaction when the current is above 100mA
- Do not decompose the product
- When preserving the ink, make sure that the lid is closed and store it in a cool and dark place
