Overview

Machine Learning Practical Class Kit is curated to complement our hands-on workshop, empowering you to dive into the world of Artificial Intelligence with ease. It is an excellent opportunity for those looking to integrate AI into their projects without the need for extensive programming knowledge.

Key Features

01 **10 XIAO ESP32S3 Sense Boards**

Meet the needs of one workshop of people, and help students to experience the power of thumb-sized yet robust MCU tailored for AI applications.

02 **Micro SD Card Tool Kit (10 Sets)**

Each set includes an SD card and essential accessories, ensuring students have all the tools needed for data handling and model training during and after the workshop.

03 **The very same kit required in Fab24 Mexico AI Workshop**

How to Add AI to Almost Everything.

04 **The prospect of AI**

Discuss the future of AI, including the role of Large Language Models in enhancing device intelligence and user interaction

05 **Interactive Demonstrations**

Experience real-time applications of AI through engaging demonstrations.

06 **Hands-On Training**

Learn the basics of sound and vision model training. Participants will actively engage in collecting and training models using the XIAO ESP32S3 Sense.
