Overview

SONOFF Dongle Lite MG21 is a versatile Zigbee USB coordinator powered by the stable and reliable EFR32MG21 chip, model Dongle-LMG21. It can be used as a Zigbee gateway in Home Assistant, openHAB, Zigbee2MQTT, or other open-source platforms to control all your Zigbee devices locally. Additionally, it can easily be flashed with Zigbee Router, OpenThread RCP, or MultiPAN RCP firmware through the SONOFF Dongle Flasher, playing different roles in the smart home.

Key Features

01 **Proven EFR32MG21 Chip**

02 **Compact Size**

03 **Wide Platform Compatibility**

04 **Easy Firmware Flashin**

05 **Includes USB Extension Cable**

Product Gallery

Applications

- **Designed as a compact Zigbee USB coordinator for open-source platforms including Home Assistant, Zigbee2MQTT, and openHAB**
- **Ideal for entry-level and small-to-medium smart home setups requiring local control of Zigbee devices**
- **Can be flashed as Zigbee Coordinator, Zigbee Router, OpenThread RCP, or MultiPAN RCP for flexible roles (including Matter over Thread support)**
- **Suitable for space-constrained installations thanks to its compact size (65% smaller than ZBDongle-E) and included USB extension cable**
