Overview

Sonoff SNZB-02 is a low-power wireless sensor that measures temperature and humidity in real time and sends synced data to the mobile phone. it features a small size and easy installation and supports Zigbee communication protocol. It's designed for indoor air environment monitoring.

Key Features

01 **The Smart Home Ecological Chain**

The use of an app equipped with Sonoff Zigbee gateway can jointly control other devices to achieve the home intelligent scene.

02 **Voice Control**

The sensor is compatible with Amazon Alexa and Google Assistant.

03 **Low Energy**

You will receive a notification when the battery capacity is lower than 10%.

04 **Tiny Size and Volume**

3M adhesive attached to the bottom of the sensor, the dimension of 43mm×43mm×14mm makes it easy to install around different parts of the home

05 **Friendly human-computer interaction**

When a phone is paired, you can share the page with friends and family and view the sensor data directly.

06 **High-Efficiency Pairing**

Efficient matchmaking in less than 30 seconds successfully.
