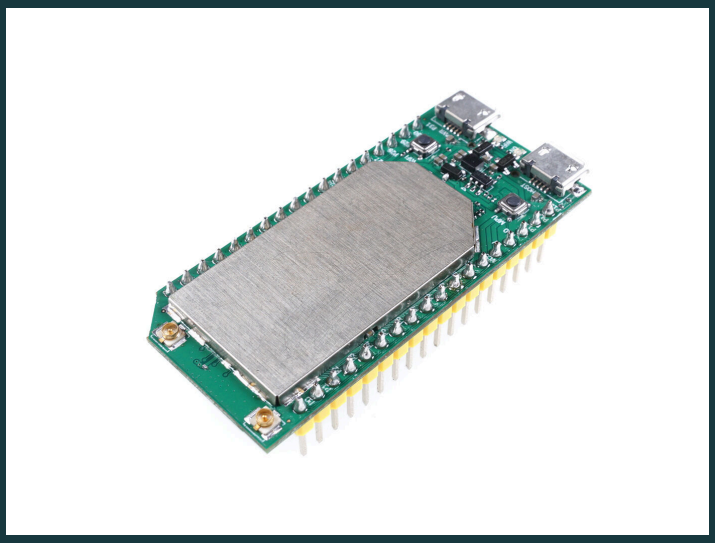
INDUSTRIAL PRODUCT DATASHEET

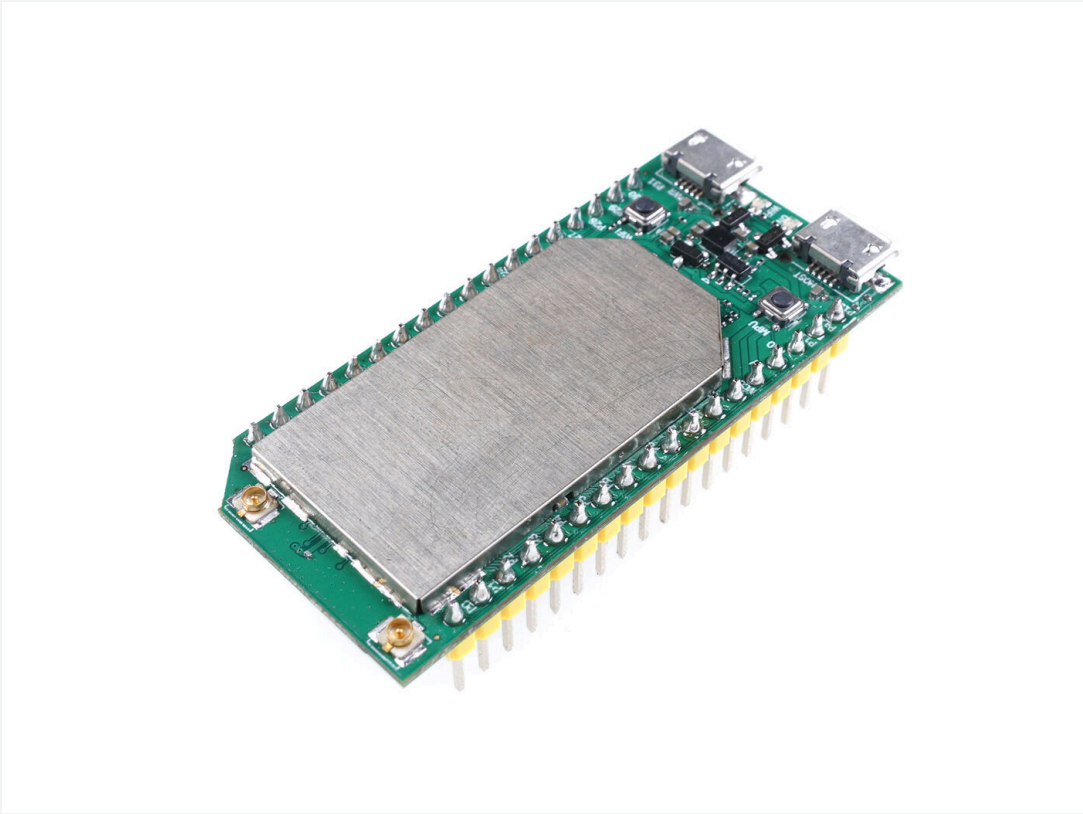
MT7628NN Development Board - With OpenWrt Linux and 2T2R Wi-Fi

MT7628NN Development Board is a Linux Wi-Fi SOC development board designed to enable the prototyping of IoT devices.

SKU	UPDATED	PRICE
114992470	2026-11-11 08:37:20	$15.00(Excl. VAT)



Overview



MT7628NN Development Board is a Linux Wi-Fi SOC development board designed to enable the prototyping of IoT devices. It is an open development platform based on the OpenWrt Linux distribution. The platform provides generous memory and storage to enable rich application developments. The platform also supports high-level languages (Python and Node.js) and native application development (C).

Key Features

01 OpenWrt Linux support

02 Wi-Fi 802.11 b/g/n with 2T2R (2 transmit/2 receive antennas) for faster speeds

03 USB Host functionality

04 Micro-SD card slot for storage expansion
