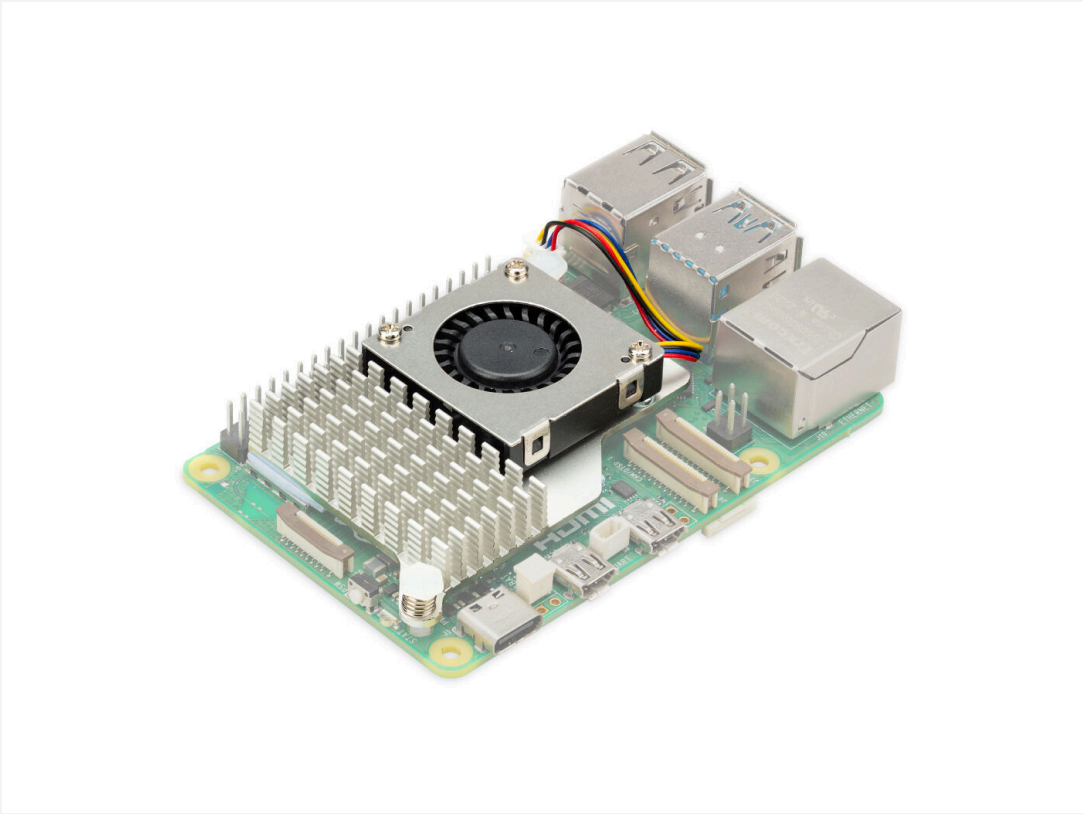
Overview



Raspberry Pi Active Cooler is an official accessory designed for the Raspberry Pi 5, providing an alternative cooling solution for sustained heavy load usage without a case. It combines a large metal heatsink with a variable-speed blower, powered and controlled via the fan connector.

Key Features

01 **Efficient Cooling Solution designed for Raspberry Pi**

combines a large metal heatsink with a variable-speed blower, allowing users to use their device under sustained heavy load without the need for a case.

02 **Easy Installation**

The cooler attaches to the Raspberry Pi 5 PCB using sprung pins that fit into a pair of mounting holes, ensuring a secure and hassle-free installation process.
