INDUSTRIAL PRODUCT DATASHEET

Liquid Level Sensor with 4–20 mA Output for Water Level, Oil Level and Mildly Corrosive Liquid Level Monitoring

The Liquid Level Sensor is designed with industry-grade standards, for monitoring water level, oil level, and other mild-corrosive liquid levels.

SKU	UPDATED	PRICE
100046384	2026-11-11 09:26:30	$79.00(Excl. VAT)

Overview

The Liquid Level Sensor is designed with industry-grade standards, for monitoring water level, oil level, and other mild-corrosive liquid levels. It incorporates stainless steel and insulated rubber, is IP68 rated, suitable for application in severe environments.

Key Features

01 **High performance**

strong interference resistance and long-term stability

02 **Robust construction**

corrosion-resistant materials for durability

03 **Easy maintenance**

anti-blocking design for easy cleaning

04 **Wide compatibility**

standard 4–20 mA current output for digital displays, PLCs, inverters, recorders, and other instruments with compatible current inputs

05 **Industrial-grade protection**

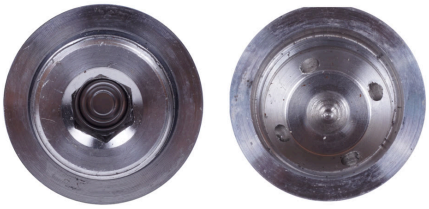

IP68-rated construction for use in harsh outdoor environments

06 **Certifications**

FCC, CE, and RoHS

Hardware Overview

Applications

- **Reservoir detection**
- **Pool pump station**
- **River monitoring**
- **Lake monitoring**
- **Sewage treatment**
- **Deep well level monitoring**
- **Tank level monitoring**
