INDUSTRIAL PRODUCT DATASHEET

Circuit Protection and Emergency Stop Switch Module for reBot Arm B601-RS

This product is specifically designed to handle the regenerative braking kinetic energy of the reBot Arm B601-RS joint module when operating under high rotational speed and heavy load conditions.

SKU	UPDATED	PRICE
100091373	2026-11-11 09:24:34	$59.90(Excl. VAT)

Overview

This product is specifically designed to handle the regenerative braking kinetic energy of the reBot Arm B601-RS joint module when operating under high rotational speed and heavy load conditions. This ensures that the power supply voltage does not rise excessively due to the regenerative energy feedback, thus preventing the occurrence of an error message indicating excessive bus voltage and resulting in machine shutdown.
