Overview

The Grove - Air quality sensor is designed for indoor air quality testing, detecting carbon monoxide, alcohol, acetone, thinner, formaldehyde and other slightly toxic gases. It features low power consumption, high sensitivity, tiny outline, and long life, with application ideas including automatic air ventilation and indoor air quality detector.

Key Features

Please consider **Grove - Air quality sensor v1.3** as alternative product

The sensor is designed for indoor air quality testing. The main gas detected is carbon monoxide, alcohol, acetone, thinner, formaldehyde and other slightly toxic gases.

Features

- Low power consumption
- High sensitivity
- Tiny outline
- Long life

Application Ideas

- Automatic air ventilation
- Indoor air quality detector

For all Grove users (especially beginners), we provide you guidance PDF documents. Please download and read through **Preface - Getting Started** and **Introduction to Grove** before your using of the product.

Documents

Please visit our **wiki** page for more info about this product. It will be appreciated if you can help us improve the documents, add more demo code or tutorials. For technical support, please post your questions to our**forum**.
