Overview

The Grove - Vibration Sensor (SW-420) is a high sensitivity non-directional vibration sensor. It is a perfect module for vibration or tilt sensor.

Key Features

01 **High sensitivity**

With the support of SW-420, it can effectively detect all kinds of vibration.

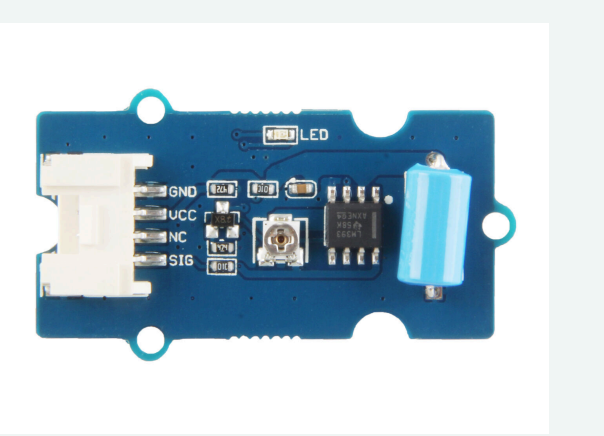

02 **Excellent endurance**

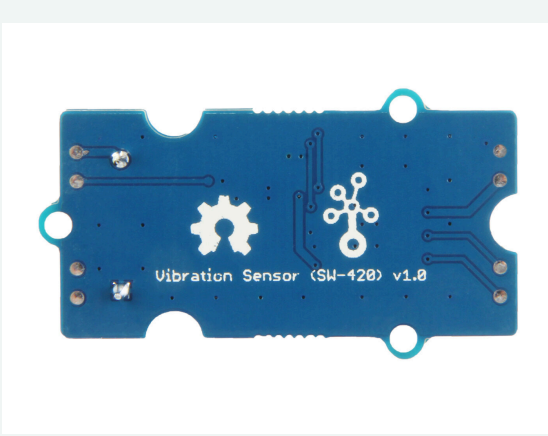

It can be waterproof and pressure resistant, no need to worry about the sensor easily damaged.

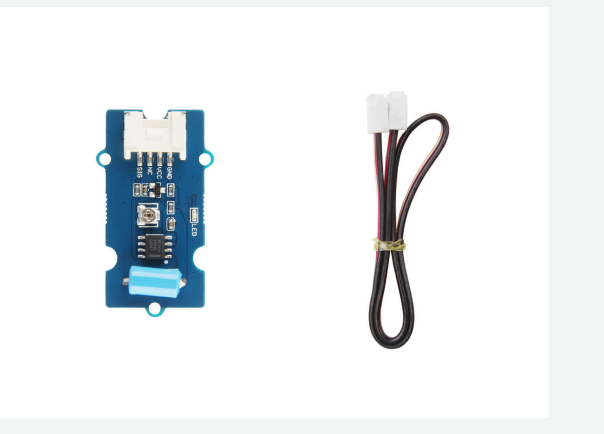

03 **Grove unified socket**

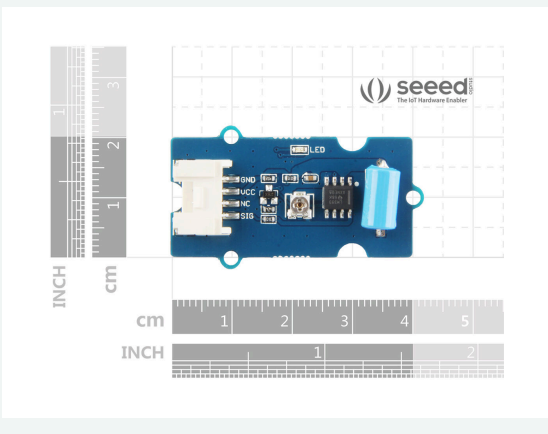

The sensor ensures "Plug and Play" and could be versatile for various applications.
