Overview

The Grove - Analog Microphone is a based on high-performance SiSonic MEMS technology, which is an ideal choice of sound sensors where excellent audio performance is required.

Key Features

01 **High-performance**

It can provide up to 20dB of gain and perfect handling even under adverse conditions.

02 **Extremely-low-noise, low-current, and reliable**

An ideal choice of sound sensors where excellent audio performance is required.

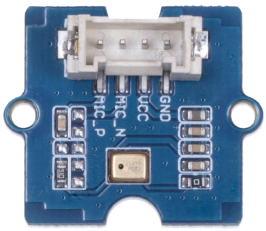

03 **Compact and elegant design**

Convenient to carry to various places.

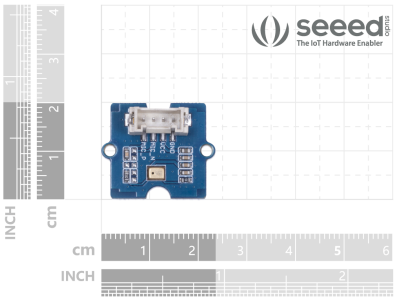

04 **Grove unified socket**

The sensor ensures "Plug and Play" and could be versatile for various applications.

Product Gallery

Applications

- **Sound sensor**
- **Collecting of sound signal**
- **Voice recognition**
- **Recording**
