Overview

This little device can turn your running water into electricity! It has a durable plastic shell for better protection and also it is a good solution to save electricity to some extent! This generator is able to produce a maximum of 12V from flowing water.

Key Features

01 Compact Size for easy deployment

02 Durable Plastic Shell for better protection

03 Better solution for energy conservation

04 Ability to charge different devices such as lithium batteries, mobile phones, and radios

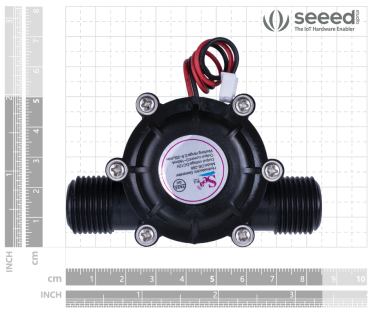

05 Anti-rust components inside

Product Gallery

Applications

- **Charge lithium batteries**
- **Charge mobile phones**
- **Applications that need 12V stable voltage supply**
