Overview

SNZB-04P is a Zigbee 3.0 protocol-based door/window sensor equipped with a tamper-proof feature, and designed for use with Home Assistant Green and the SkyConnect USB Stick to optimize your smart home comfort.

Key Features

01 **Tamper Alert**

Equipped with tamper-proof features ensures your peace of mind. Receive App notifications on your phone if the sensor is tampered with.

02 **Add to Home Assistant**

Seamlessly integrates with Zigbee hubs utilizing the Zigbee 3.0 protocol, easily add to Home Assistant for your home automation through ZHA or Zigbee2MQTT

03 **Local Scene Intelligent Linkage**

Even if your Wi-Fi network crashes, you can still activate Zigbee local scenes as long as your Zigbee devices are powered on. Lower latency, higher reliability.

04 **Extended Battery Life**

Using CR2477 battery extends the battery life to over 5 years, eliminating concerns about frequent battery replacements.

05 **Support by Platforms**
