Overview

Sipeed MaixCube is an all-in-one development platform based on the M1n module which is powered by the Kendryte K210 core. It is equipped with a camera, TF card slot, user buttons, TFT display, lithium battery, speaker, microphone and an expansion interface. This provides a great platform for everyone to start learning about AI development.

Key Features

01 All-in-One Platform with Rich Peripherals

02 K210 RISC-V 64-bit Dual-Core CPU for Powerful AI Applications

03 Computing Power up to 1TOPS for Heavy Machine Vision Applications

04 Built-in FPU, KPU, FFT Hardware Acceleration Units

05 Built-in APU for High-Quality Audio Processing

Product Gallery

Applications

- Face Detection
- Object Recognition
- FFT Spectrum Analysis
- Game Simulation
