Overview

LinkStar-H68K-V2 router equips quad-core Cortex-A55 RK3568 chip, featuring 4 Ethernet interfaces for dual-2.5G and dual-1G, along with Wi-Fi 6 technology, while providing high storage capacity and media player functionality, functioning recommended for indoor use. Compared with the first H68K generation, it not only has better communication and heat dissipation effect, but also the interface layout is more reasonable and convenient.

Key Features

01 **Lightning-fast Network Ports**

Dual 2.5Gbps Ethernet & dual 1Gdps Ethernet,4 interfaces overall for fast speed router deployment

02 **Outstanding Wi-Fi 6 Technology**

Up to 1200Mbps, support 2.4G/5G dual-band for high throughput performance

03 **4K Multimedia Player**

Pre-installed Android 11 OS, mounted with one HDMI 2.0 port for 4K@60fps display with HDR support

04 **High Storage Capacity**

Equip onboard 32Gb eMMC, an SD card slot, and a USB 3.0 Type-C for massive storage, Type-C supports the SATA function in the docking kock

05 **Pocket-sized Metal Box**

Carry everywhere, built around with metal for passive heat dissipation

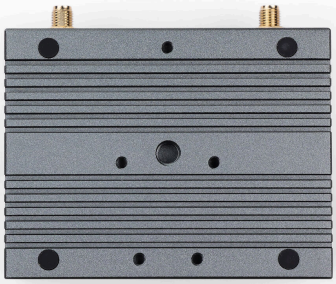

06 **Multiple Operating Systems Supported**

OpenWRT, Armbian
