INDUSTRIAL PRODUCT DATASHEET

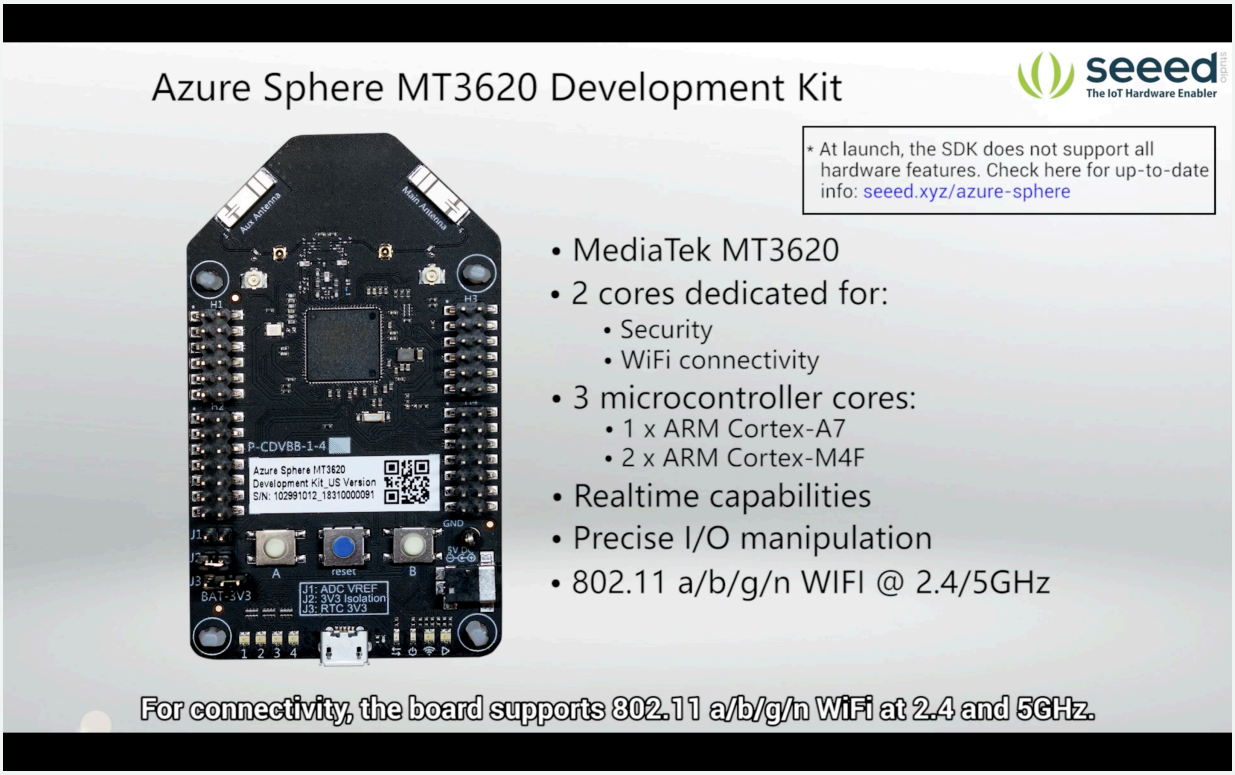

Azure Sphere MT3620 Development Kit_US Version

Microsoft Azure Sphere is a solution for creating highly-secured, connected, MCU-powered devices.

SKU	UPDATED	PRICE
102991012	2026-11-20 23:20:25	$93.40(Excl. VAT)

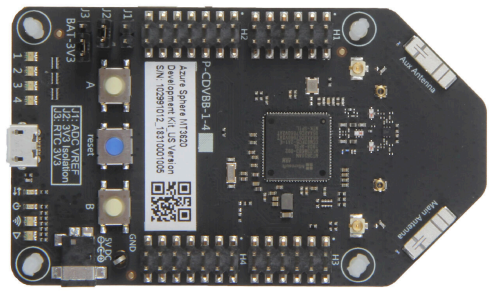

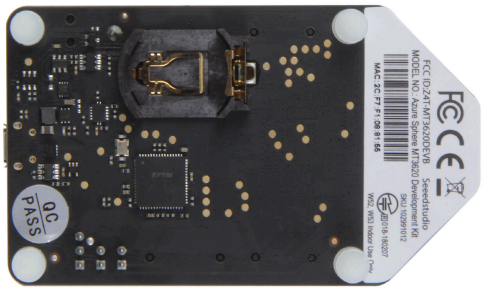

Overview

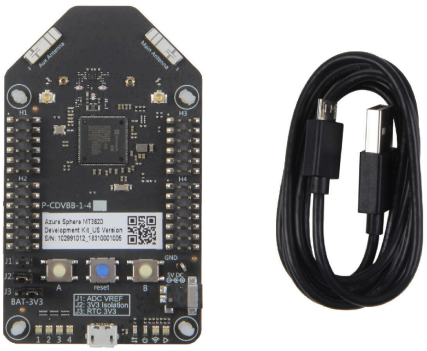

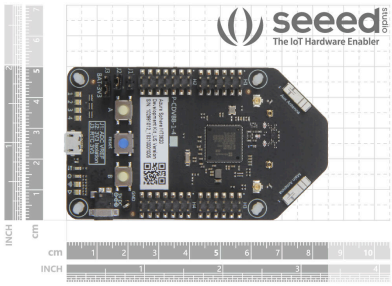

Microsoft Azure Sphere is a solution for creating highly-secured, connected, MCU-powered devices. Azure Sphere brings together the best of Microsoft's expertise in cloud, software and silicon—resulting in a unique approach to security that starts in the silicon and extends to the cloud. Azure Sphere MT3620 Development Kit is specially designed to support rapid prototyping and to enable developers to experience Azure Sphere technology. The MT3620 is designed to support real-time requirements when interfacing with a variety of on-chip peripherals including GPIO, UART, I2C, SPI, I2S, PWM and ADC
