Overview

The Grove - SPDT Relay(30A) - High Current and Normally closed is a Grove-compatible SPDT relay with a coil rated up to 5V and a contact rated up to 30A (@250VAC, 30VDC). It is normally closed, meaning the two contacts are closed when the coil is not energized, allowing current output to different directions to control two devices.

Key Features

01 **High Switching Current**

The relay's coil is rated up to 5V and the contact is rated up to 30A (@250VAC, 30VDC)

02 **SPDT Relay**

The current output to different directions can be used to control two devices

03 **Normally closed relay**

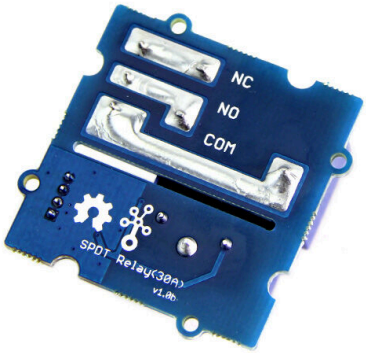

The two contacts are closed when the coil is not energized

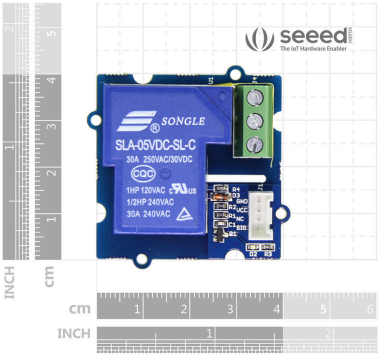

04 **Grove compatible interface**

The product ensures "Plug and Play" and could be versatile for various applications of Grove
