Overview

The 2.04 E-Ink Display Shield provides a high resolution e-paper display with low power consumption and wide viewing angle. It supports four grey level modes and maintains a clear display even in the power-off state, with characters for 175 languages.

Key Features

This product is discontinued and replaced by Small e-paper Shield.

Small e-paper Shield

Do you like Amazon Kindle’s E-paper screen? E-ink Display Shield, an E-paper & shield which uses exactly the same techniques, provides you a smooth and clear reading experience for you. It has a super-low power consumption. It won’t consume power until next refreshing of its screen, which enables it to maintain a clear display even in the power-off state. Users can customize texts and position of the characters displayed .Due to the character chip inside, it knows of 175 countries’ language and their respective characters.

Note: Headers of this product is shipped unsoldered.
