Overview

The 1.47-inch LCD Display Module boasts a remarkable 172x320 resolution and a vibrant spectrum of 262K colors. It features a SPI interface that conserves IO pins and seamlessly connects with popular controller boards such as Raspberry Pi, Arduino, and STM32.

Key Features

01 **Outstanding Display Effect**

172×320 resolution, 262K RGB colors, clear and colorful displaying effect

02 **Versatile Interfaces**

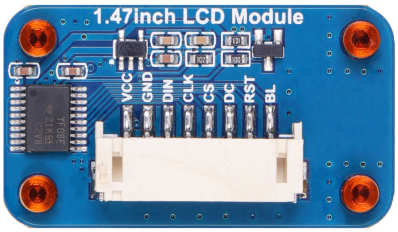

SPI interface, minimizes required IO pins, supports controller boards like Raspberry Pi/Arduino/STM32

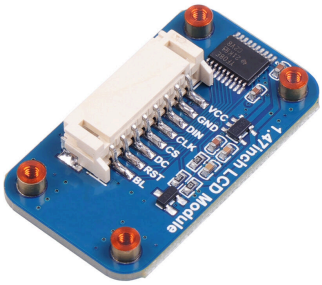

03 **Abundant Online Course**

Comes with online development resources (examples for Raspberry Pi/Arduino/STM32)

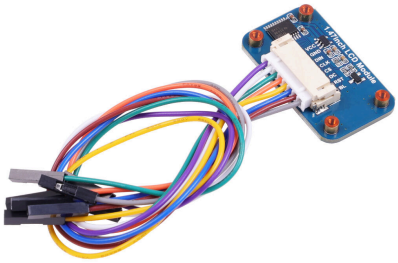

Product Gallery

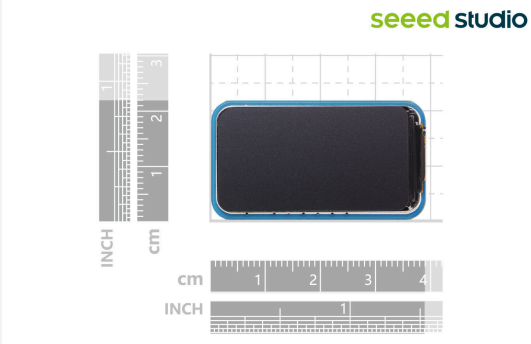

Applications

- **Smartwatches**
- **Digital Photo Frames**
- **Handheld Gaming Consoles**
