Overview

Grove - Vibration Motor consists of one coin type motor which is a permanent magnet coreless DC motor. It vibrates when the input logic is HIGH which can be used to notify the user. Integrated with Grove interface, it provides a simple way to connect with Arduino boards without soldering (A Grove Base Shield is required).

Key Features

01 **Permanent Magnet Coreless DC motor, vibrates when the input logic is HIGH**

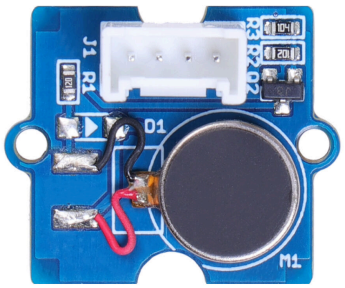

02 **Coin size(24mm x20mm), compact design, embed into your project easily**

03 **Grove**

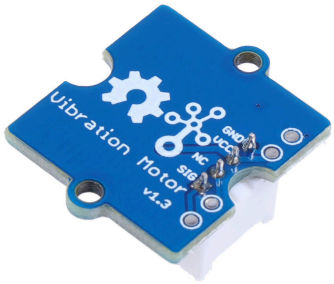

Compatible Interface, play and play

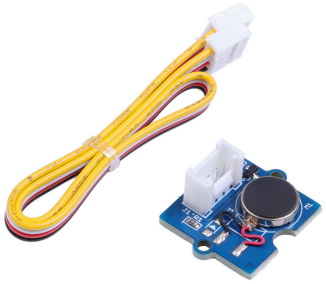

04 **Compatible with Arduino & Raspberry Pi, detailed instruction provided**
