INDUSTRIAL PRODUCT DATASHEET

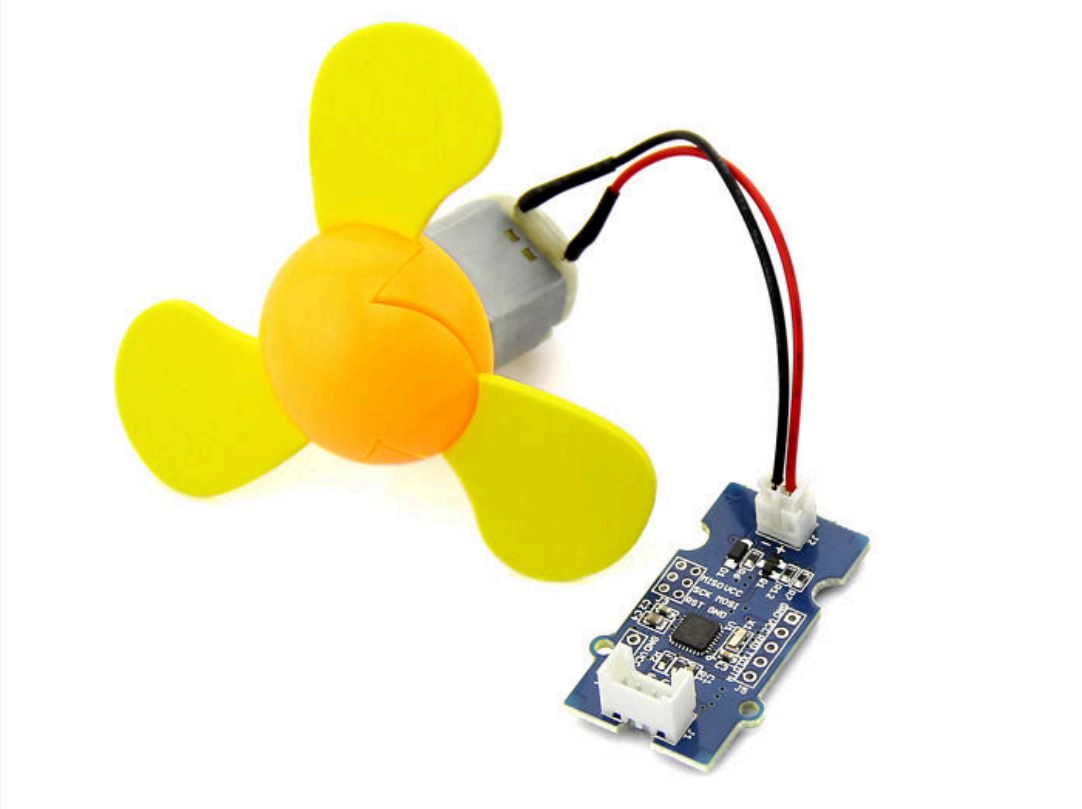

Grove - Mini Fan

A kid-safe, Arduino-compatible mini fan with soft blades, Grove connector, and expandable servo control.

SKU	UPDATED	PRICE
105020004	2025-09-02 07:19:11	$3.90(Excl. VAT)

Overview

The Grove - Mini Fan is a DC motor driver based on the ATmega168 microcontroller, designed for kids with soft fan blades for safety. It features a Grove connector for easy connection, is Arduino-compatible, and includes a servo connector for expandability.

Key Features

This product is retired, please consider the new version **Grove - Mini Fan V1.1**.

Grove - Mini Fan is a DC motor driver base on AVR microcontroller Atmega168,you can change code by breakout , this module also reserve servo connector,it can driver servo by change code ,Grove - Mini Fan is design for kids, which is use soft fan-leafed in order to avoid unnecessary damage.

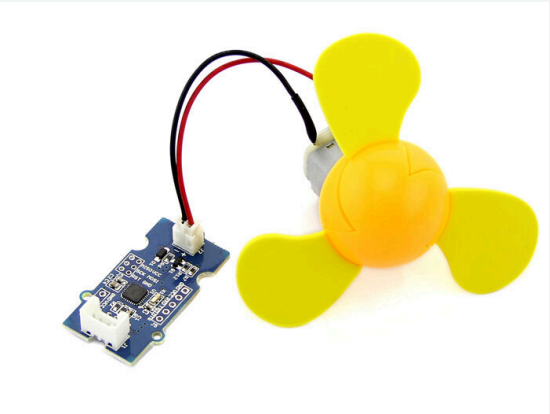

Features

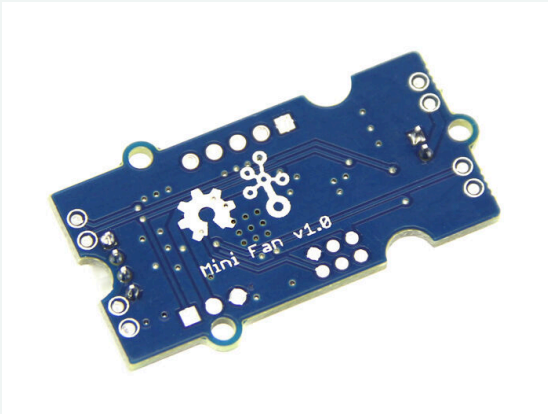

- Grove connector
- Soft fan-leafed
- Arduino compatible
- User-friendly

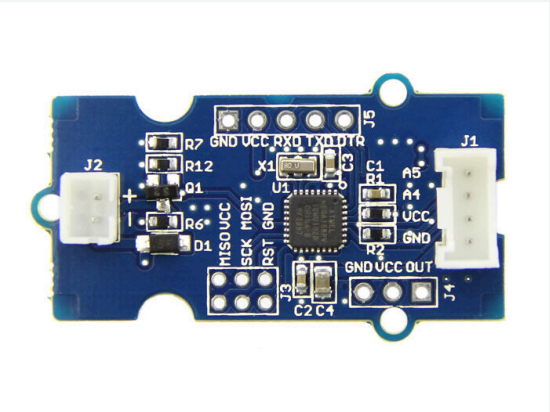

Part List

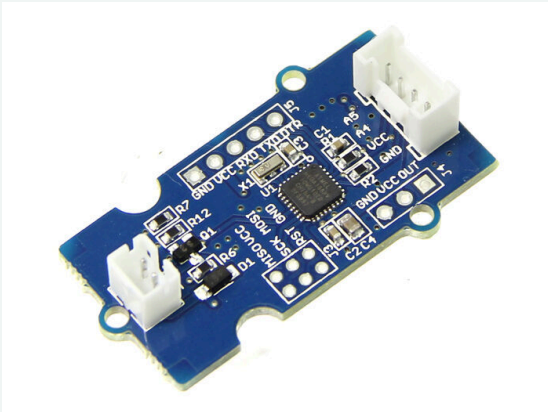

- Grove - Mini Fan
- Fan
- DC Motor
- Grove Cable-20cm
