Overview

27W USB-C PD Power Supply is an official accessory for the Raspberry Pi 5, delivering 5.1V, 5A power. It increases the USB power limit to 1.6A when the USB-C PD Power Supply is detected.

Key Features

01 **High Power Delivery**

Provides a maximum output of 27W, allowing it to power a wide range of peripherals. It delivers 5.1V at 5A, enabling efficient performance.

02 **Compatibility with Raspberry Pi 5**

Specifically designed for the Raspberry Pi 5 and automatically increases the power limit from 600mA to 1.6A when detected, ensuring optimal power usage.

03 **Multiple Voltage Supply**

Capable of delivering 3A@9V, 2.25A@12V, and 1.8A@15V to PD-compatible products, making it a good cost-effective power supply for many general-purpose, non-Raspberry Pi use cases.

04 **Wide Input Voltage Range**

Supports a broad input voltage range of 100-240VAC, making it compatible with different power standards worldwide.

05 **Convenient Connectivity**

It features a USB-C connector, which is widely used and provides reliable and efficient power transfer.
