Overview

This is the 3-Pack Bundle of XIAO SAMD21, a mini Arduino compatible board built on Microchip SAMD21G18 MCU. As the flagship model in Seeed Studio XIAO series, this thumb-sized board offers professional-grade performance in an ultra-compact form factor with a SMD design. With comprehensive support for Arduino IDE, MicroPython, and PlatformIO, along with extensive learning courses and tutorials, it's an excellent platform for beginners entering the world of open-source electronics.

Key Features

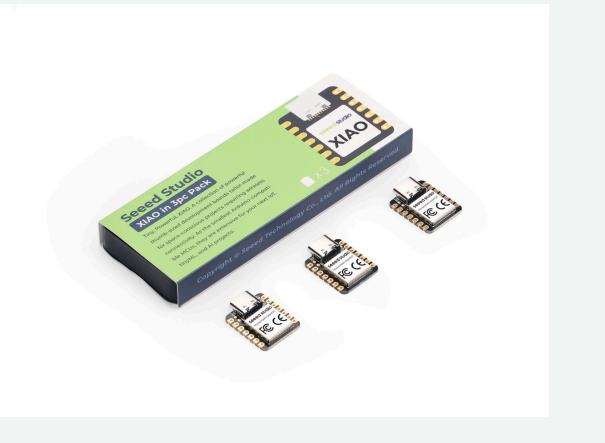

01 **The Perfect Arduino Board for Electronics Beginners**

02 **Better Value, More Creation with 3PCS Pack**

03 **Classic Form Factor and Extensive Seeed Studio XIAO Ecosystem**

04 **Production-Ready Design with Fusion PCBA Support**

Hardware Overview

Applications

- **Learning & Education (Arduino, MicroPython, basic electronics and prototyping)**
- **Wearable devices (health monitoring, interactive clothing, compact fitness trackers):** IoT & Sensor Projects (Environmental monitoring, data collection devices, smart home sensors, small automation systems)
- **Space-Constrained Mini Arduino Projects (Miniature robots, portable devices, small electronics gadgets, embedded control systems)**
- **Rapid prototyping (Quick proof-of-concept builds, hardware testing, product prototypes, embedded system development)**
- **HID devices (DIY keyboard, USB to multi-channel TTL/USB host mode, etc.)**
