Overview

The Grove Starter kit for Arduino&Genuino 101 provides a plug-and-play Grove system with a base shield compatible with Arduino/Genuino 101 or Uno form factor boards, and includes various well-chosen sensors and actuators for rapid prototyping. It enables quick and easy project development without soldering, though the Arduino/Genuino 101 board is not included.

Key Features

Description
Holding both an **Arduino/Genuino 101**and a nice idea but don't know where to start? This kit can help you on that. It introduces the simplicity of **Grove System** to your Arduino project. The Grove Base Shield works perfectly on the Arduino/Genuino 101 or any development board that applies the Arduino Uno form factor. With a bunch of well-chosen and plug-and-play Grove modules, you can set up a project and turn your idea into real thing easily and quickly. Now check out the part list below to see what we've prepared for you!

NOTE: This kit DOES NOT include the Arduino/Genuino 101.

Features

- Plug-N-play Grove system
- Easy-to-use base shield for Arduino/Genuino 101
- Various well-chosen Grove sensors and actuators for rapid prototyping
