Overview

The Grove Starter Kit Plus - IoT Edition provides a solderless, plug-and-play prototyping experience with a variety of Grove sensors and actuators. It includes a Grove Base Shield compatible with numerous Arduino-compatible boards such as Intel Edison for Arduino, LinkIt One, and Genuino 101.

Key Features

Description
No soldering, no jumper wires, no jitters. Simple, easy, and fast. This is how this kit gonna make you feel when you use it to make your IoT devices - a totally enjoyable making process.

The Grove Base Shield in the kit can works on a lot of Arduino compatible development boards including the **Intel Edison for Arduino**, **LinkIt One**, and **Genuino 101** etc.

Beyond the Grove Shield is a bunch of Grove sensors and actuators with build-in Grove interfaces, makes your prototyping faster and easier. Simply plug in the modules and you are ready to create.

Features

- Various sensors and actuators for rapid prototyping
- Plug-and-play modules
- Works on lots of Arduino Compatible Boards
