Overview

Due to component shortage, J2011 is discontinued, we recommend a new reComputer J2021, built with Jetson Xavier NX 8GB module, rich set of IOs carrier boards, aluminum case, cooling fan, and pre-installed JetPack System, for your next AI application development and deployment.

Key Features

01 **Hand-size edge AI device**

built with Jetson Xavier NX 8GB Production Module, delivering 384 NVIDIA CUDA® cores delivers up to 21 TOPs AI performance with the small form factor of 130mm x120mm x 50mm.

02 **NVIDIA Jetson Xavier NX Dev Kit alternative**

the carrier board brings rich IOs including Gigabit Ethernet port, 4 USB 3.0 Type-A ports, HDMI port, and DP port

03 **Pre-installed NVIDIA JetPack**

support entire Jetson software stack and various developer tools for building fast and robust AI application provided by Seeed Edge AI partners, helps develop innovative AI solution for manufacturing, logistics, retail, service, agriculture, smart city, healthcare, and life sciences, etc

04 **Power-efficient**

as little as 10 watts, delivering high performance, accurate, multi-modal AI inference at the edge.

05 **Expandable with the onboard interfaces and reComputer case, able to mount on the wall with mounting holes on the back.**
