Overview

The uArm Vaccunm Gripper System Kit is an accessory for uArm driven by a 5V Air Vacuum pump and valve, holding up to 1 kg. It picks up smooth-surfaced objects and is controlled via two digital signals, compatible with Arduino, Raspberry Pi, and other microcontrollers.

Key Features

Introduction:

The Vacuum Gripper System Kit is an useful accessory for uArm. Driven by a 5V Air Vacuum pump and valve, it can hold about 1 kg weight. It can pick up a lot of objects with smooth exterior, also easy to be controlled with two digital signal, compatible Arduino board, Raspberry Pi or any other microcontroller board to control this gripper system.

Features:

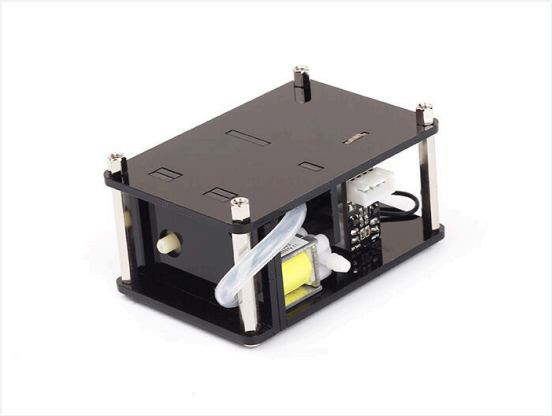

- The Vacuum Gripper System Kit is an useful accessory for uArm.
- Driven by a 5V Air Vacuum pump and valve, it can hold about 1 kg.
- It can pick up a lot of objects with smooth exterior.
- It is super easy to be controlled with two digital singnal, so you can use your Arduino board, your Raspberry Pi or any other microcontroller board to control this gripper system.
