INDUSTRIAL PRODUCT DATASHEET

Robot Car Kit-6WD Off-Road Chassis Kit

The newly designed 6WD mobile platform uses a 2mm aluminum alloy for one-time stamping and the surface is then sprayed.

SKU	UPDATED	PRICE
110090325	2026-10-26 06:39:03	$99.90(Excl. VAT)

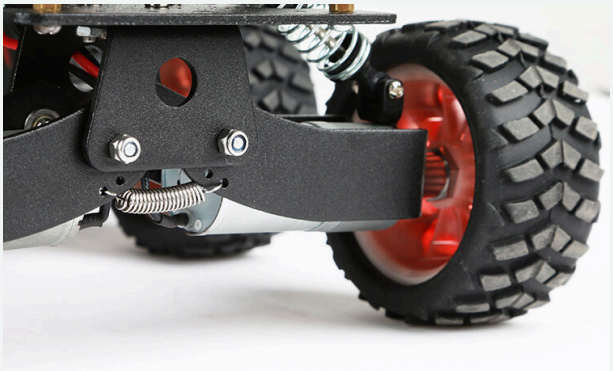

Overview

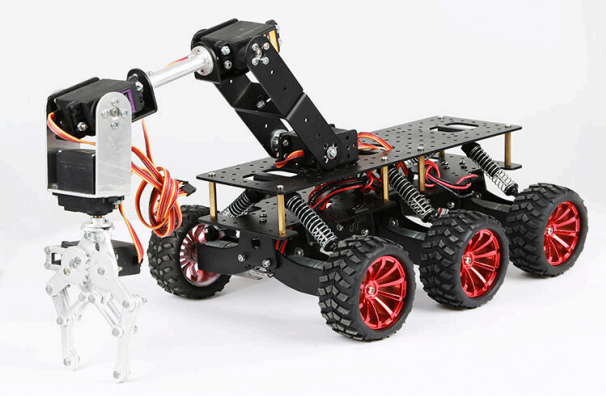

The newly designed 6WD mobile platform uses a 2mm aluminum alloy for one-time stamping and the surface is then sprayed. 6 high-speed DC motors (original 17000 rpm), combined with 1:34 full metal gearbox, enable the car to obtain strong off-road performance. The upper base plate reserves the mounting holes of the Arduino platform and the Raspberry Pi platform.
