INDUSTRIAL PRODUCT DATASHEET

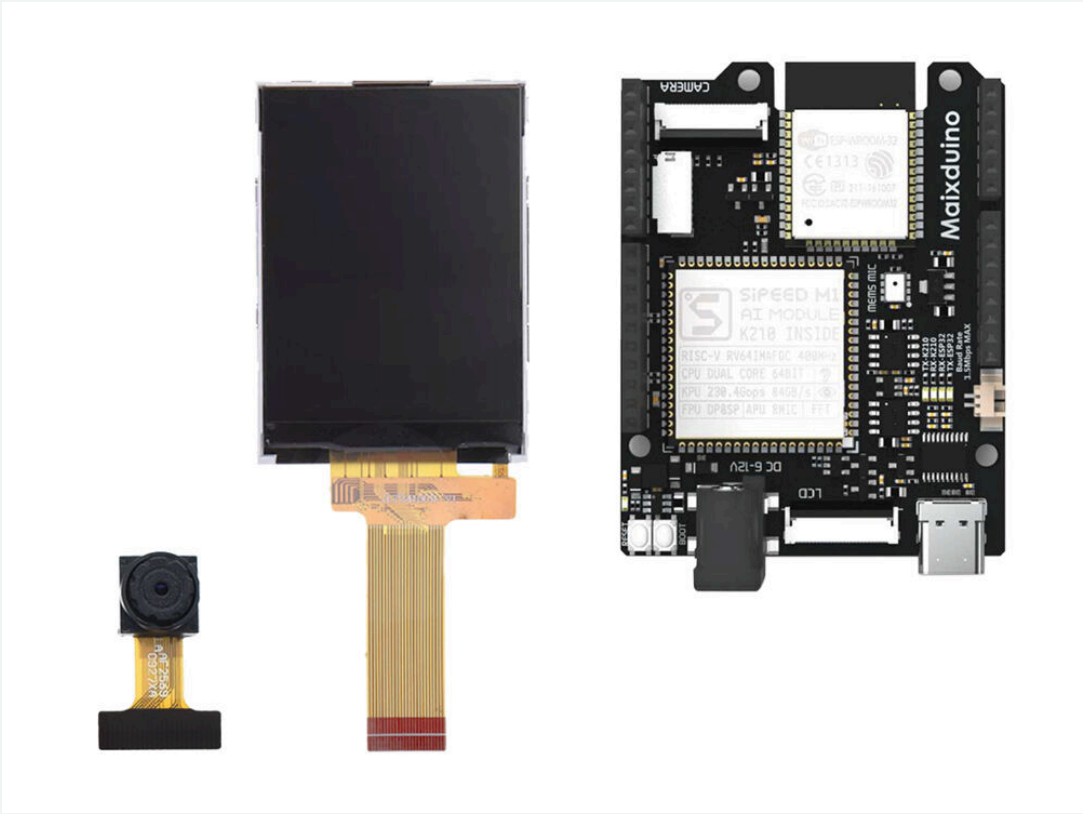

Sipeed Maixduino Kit for RISC-V AI + IoT

Based on MAIX Module, the Maixduino is a RISC-V 64 development board for AI + IoT applications.

SKU	UPDATED	PRICE
110110044	2026-11-11 08:21:08	$34.90(Excl. VAT)

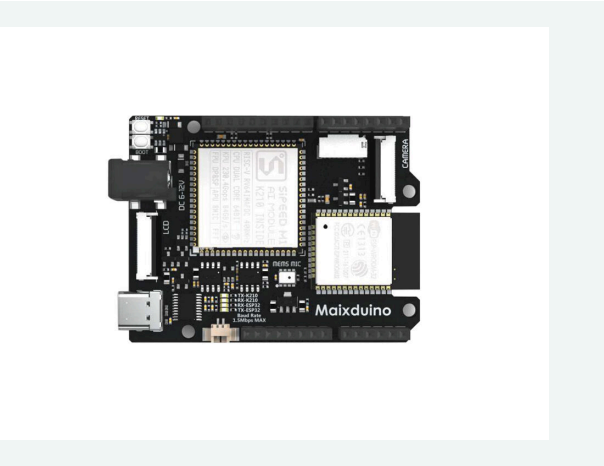

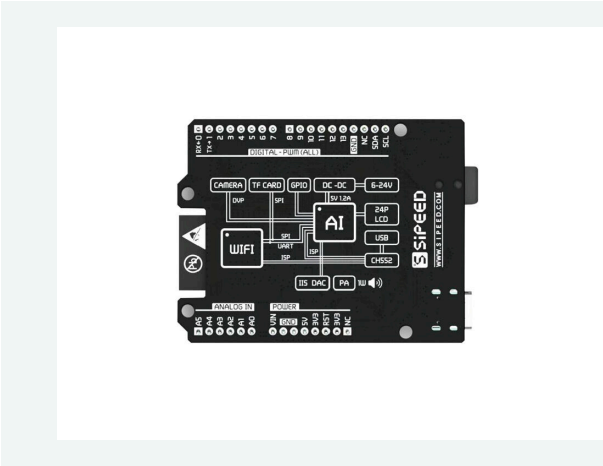

Overview

Based on MAIX Module, the Maixduino is a RISC-V 64 development board for AI + IoT applications. Different with other Sipeed MAIX dev. boards, Maixduino was designed in an Arduino Uno form factor, with ESP32 module on board together with MAIX AI module.

Applications

- Smart Home applications like robot cleaners, smart speakers, electronic door locks, household monitoring etc.
- Medical Industry applications like Auxiliary diagnosis and treatment, medical image recognition, emergency alarm etc.
- Smart Industry applications like industrial machinery, intelligent sorting, monitoring of electrical equipment, etc.
- Education applications like educational robots, intelligent interactive platforms, educational efficiency inspection, etc.
- Agriculture applications like agricultural monitoring, pest and disease monitoring, automated control, etc.
