Overview

Sonoff ZB Bridge is a gateway that Supports Zigbee and WiFi Protocol and has Long-distance Signal Transmission within 80M, of course, ZB Bridge can support all the Zigbee devices and up to 32 products that Sonoff has released. And supports hands-free voice control by connecting Alexa or Google Assistant to intelligent your daily life.

Key Features

01 **Customized smart home furniture**

ZBBridge supports adding up to 32 Zigbee products already released by Sonoff, such as SNZB-02, to make your home smarter.

02 **Simple management of multiple sensors**

All bundled Zigbee products could be viewed or controlled through the eWeLink App.

03 **Ultra-long-distance transmission**

The communication distance between the two devices is within 80. If it exceeds 80, a router can be added to expand the communication range of Zigbee.

04 **Hand-free voice control**

You can use your voice to control smart furniture in your home by calling Alexa or Google Assistant.

05 **Support Zigbee and Wi-Fi Protocol： Zigbee's sub-device itself is unable to communicate with WiFi devices, a ZBBridge is needed to enable Zigbee devices and WiFi devices to communicate and create smart scenes.**
