Overview

SNZB-04 is a Zigbee low-power and intelligent security wireless door and window sensor, it is through the magnet and the transmitter is separated to trigger the transmitter. The transmitter sends a trigger message to the App in time. And can use hand-free Voice control and interacts with Alexa/Google Assistant, an excellent choice for monitoring home security in time or interacting with smart appliances in the home.

Key Features

01 **Real-time synchronization of data**

Check the sensor status through the App to get the latest and most real data. Of course, You can also add a camera to view or scare the stranger off with your voice.

02 **Historical data query**

You can view all the data for the 90 days/3 months anytime, anywhere, and all the records or data are automatically saved.

03 **Hand Free Voice Control**

When you are at home not sure if the doors and windows are closed, you can ask your Alexa/ Google Assistant instead of running home right away.

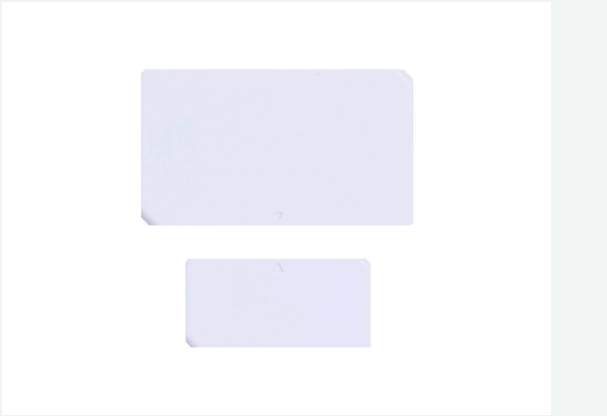

04 **Low power consumption and Low battery Reminder**

You can check whether the SNZB-04 is in a low battery through the app, or the app will inform you that the Senor is about to run out of battery.

05 **Simple installation**

DW2-WiFi is installed with 3M adhesive tape and just needs Simple peel-and-stick installation, it is easy to fit in door frames and window sills.
