INDUSTRIAL PRODUCT DATASHEET

Sony AIH-IVRW2 Camera, China Version

Edge AI device "AIH-IVRW2" with AI training tool and device.

SKU	UPDATED	PRICE
113991394	2026-11-23 10:06:05	$285.00(Excl. VAT)

Overview

Edge AI device "AIH-IVRW2" with AI training tool and device.

Key Features

01 **On-Camera AI Image Processing**

Integrates the Sony's IMX500 sensor with AI capabilities directly on the sensor, eliminating the need for external processing or memory.

02 **Reduced Latency**

Performs image processing on-camera, minimizing data transfer time and ensuring faster results.

03 **Energy Efficient**

Lowers power consumption, offering a more cost-effective and environmentally friendly solution.

04 **Comprehensive Platform**

Utilizes Sony's Local Edition for device management, AI development, and seamless system and cloud integration.

05 **Wi-Fi Communication**

Features ESP32 Wi-Fi for easy and flexible system integration, ideal for various applications including retail, smart buildings, manufacturing, logistics, and industrial automation.

Product Gallery

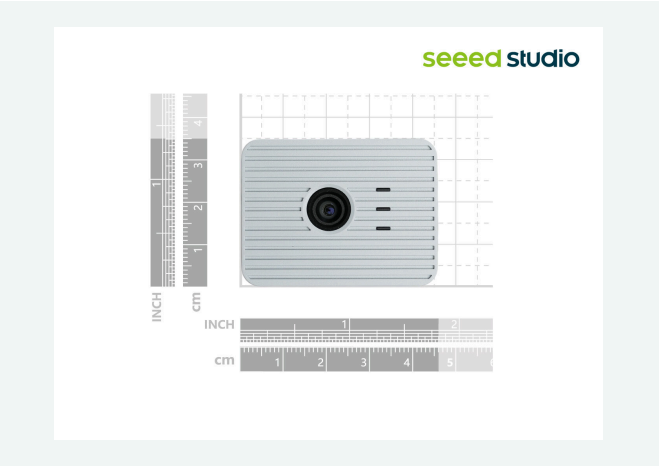

Applications

- **Retail: Enhances customer analytics and store management with real-time AI image processing and data analysis directly on the camera.**
- **Smart Buildings: Optimizes building automation and monitoring systems by providing efficient and secure on-camera processing for various sensors and devices.**
- **Industrial Automation: Improves production line efficiency and quality control by integrating AI-driven image analysis directly into manufacturing and logistics workflows.**
