Overview

The water cooling radiator, a collaborative product released by Seeed Studio and 52Pi, which is one of the accessories of the High-Performance Water Cooling RGB integrated CPU Cooler. If you're cooling multiple Raspberry Pi 5B, simply add this device

Key Features

01 **Made for Raspberry Pi**

Specially designed for Raspberry Pi 5, 1:1 mold opening, capable of long-term stable operation.

02 **Cooling Performance**

Effectively dissipates heat generated by the Raspberry Pi, ensuring optimal operating temperatures and preventing overheating.

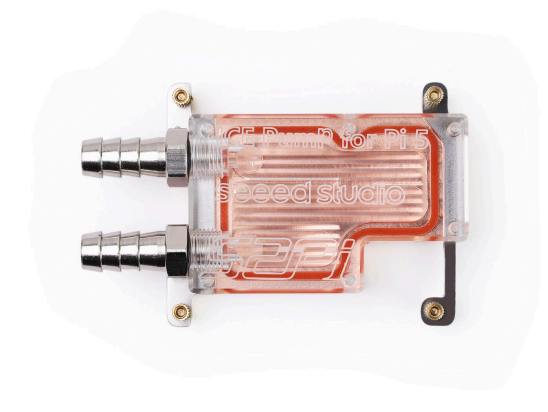

03 **Eesy to Use**

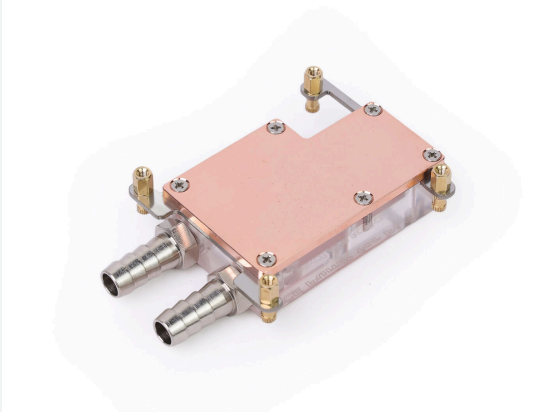

The integrated design of the water pump and cooling fan is convenient for users to install

04 **Safety Protection**

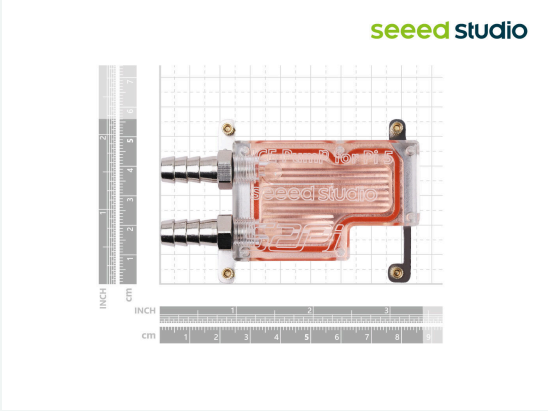

The tight fit of the two sides can effectively prevent physical damage to the Raspberry Pi 5, A transparent acrylic shell, ensures that the liquid will not leak.
