Overview

The BliKVM HAT Black is an extension board for the Raspberry Pi 4, providing KVM-over-IP remote control, ATX control, and multiple media output options for secure and stable equipment management. It equips an OLED display, and onboard modules such as a fan and real-time clock, as well as PoE and USB power supply for the user's convenience.

Key Features

01 **Raspberry Pi HAT for Remote Control**

Provide KVM-over-IP solution while integrating Raspberry Pi, offering easy devices remote management via all modern web browsers, designed with BIOS-level, secure and stable

02 **ATX Control**

Enable remotely switching the equipment on and off, or resetting, as well as monitoring power & storage LED activity

03 **Steady and Multiple Media Output**

Apply I2S for both video and audio, offer input resolution 1080p@50fps, with fixed HDMI back power issue

04 **Onboard OLED Display**

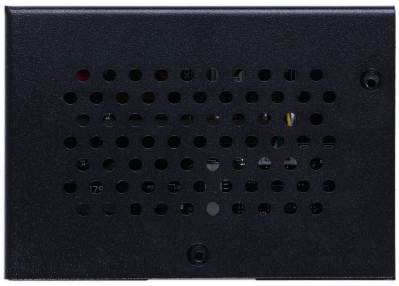

Show the temperature, IP address, and other information of the integrated Raspberry Pi for users' convenience

05 **Flexible Charge Mode**

Allow both PoE and USB power supply
