Overview

The 12V DC Water Pump is a lightweight, small-size, high-efficiency, low-consumption, and low-noise pump, widely used for household applications such as cooking, cleaning, bathing, space heating, and watering flowers. It operates with a working voltage of DC10~13V, no load current of 250mA, suction lift of 100mm, spit out lift of 500mm, and a flow rate range of 1.31±0.26L/min.

Key Features

This is lightweight, small size, high efficiency, low consumption and low noise water pump.

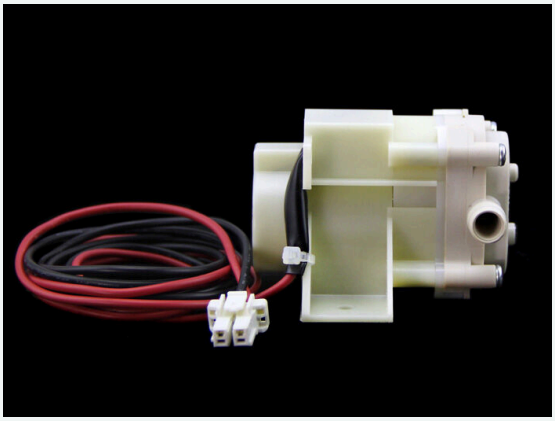

It has been used widely, in household include cooking, cleaning, bathing, space heating and water flowers, etc.

Features

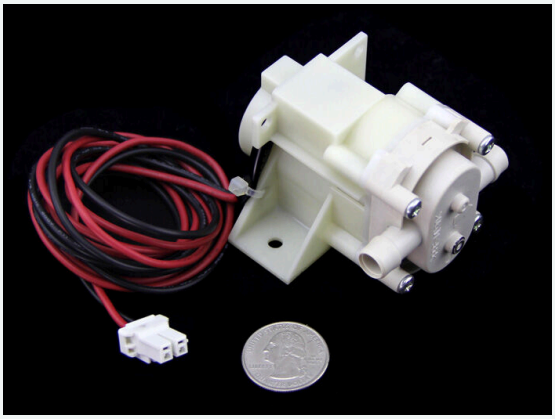

- High Quality Hall Effect Sensor
- Compact, Easy to Install
- Specification：
- Working Voltage: DC10~13V
- No Load Current: 250mA
- Temperature Range: -30~0°C
- Suction Lift: 100mm
- Spit Out Lift: 500mm
- Flow Rate Range: 1.31±0.26L/Min

Compliance & Logistics

HSCODE	8413709910
ROHS	1

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

15.21

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy.

If not installed and used in accordance with the instructions, it may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
