INDUSTRIAL PRODUCT DATASHEET

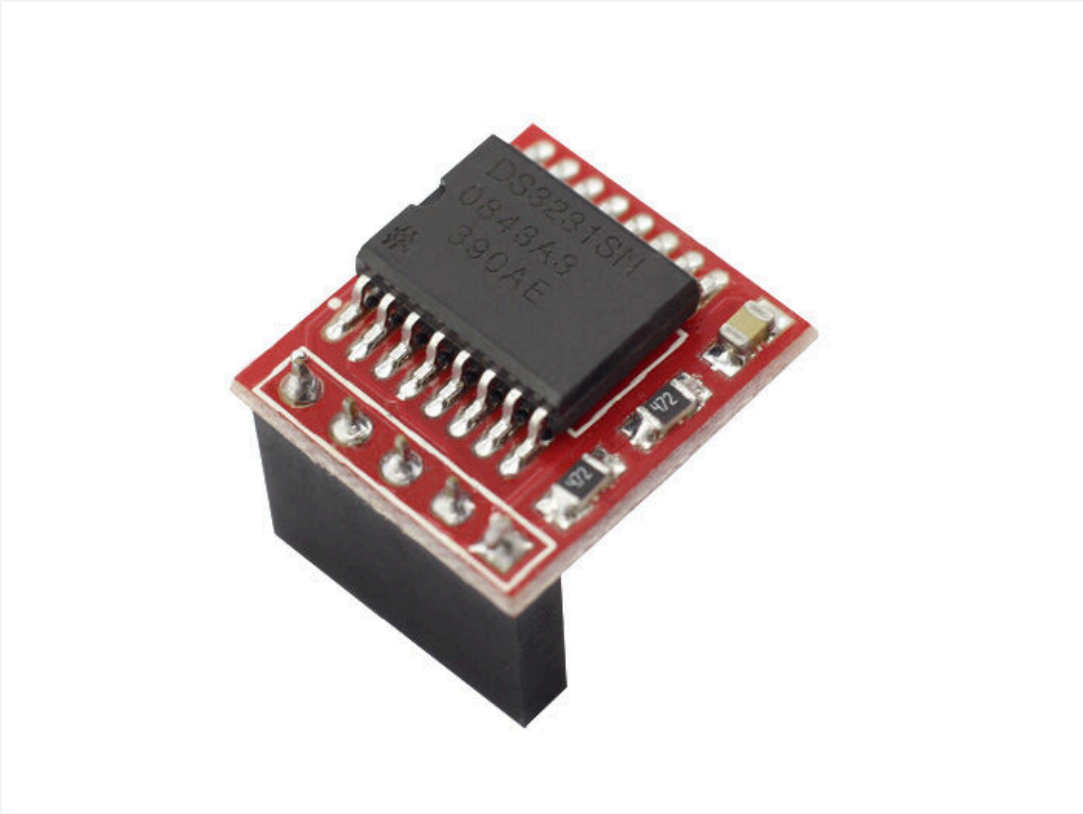

RTC Module - Super Capacitor

Discontinued super capacitor RTC module with DS3231 for Raspberry Pi and Arduino, operating at 3.3V/5V.

SKU	UPDATED	PRICE
114990108	2024-08-09 02:07:26	$5.45(Excl. VAT)

Overview

This product is discontinued, please consider the Raspberry Pi RTC Expansion Module v1.1 as an alternative. It is a Super Capacitor Real-Time Clock module with DS3231 RTC IC, designed for Raspberry Pi and Arduino, working at 3.3V and 5V, and measuring 14x16x12 mm.

Key Features

This product is discontinued, please consider the **Raspberry Pi RTC Expansion Module v1.1** as an alternative.

This is a Super Capacitor Real-Time Clock module, it design for Raspberry Pi, but it also can be used to Arduino.

Pluging it into Raspberry Pi GPIO interface, and all is ok. This is the easiest way to keep it in time.

Compared with the **Mini RTC Module**，it not include battery. Because it has super capacitor.

Features:

Super capacitor

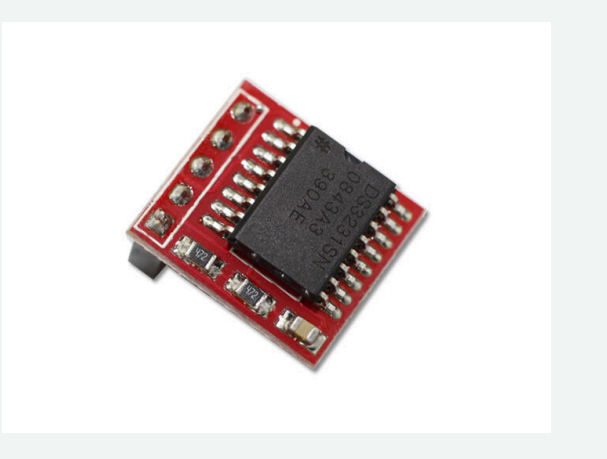

- Smaller
- Work in 3.3V and 5V
- Supported Raspberry Pi and Arduino
- Compatible with Raspberry Pi A+,B,B+/2.

Specification:

DS3231 RTC IC

- Self-adjust 3.3V and 5V
- Size: 14x16x12 mm
