Overview

[image] The Flow Deck v2 is an add-on board for the Crazyflie 2.1 drone that enables stable indoor flight with optical flow and Tof sensors. It offers accurate and responsive control up to 4m, making it a powerful tool for researchers, developers, and drone enthusiasts.

Key Features

01 **Stable Flight**

Optical flow and Tof sensors for stable indoor flight without GPS

02 **High update rate and long-range**

High update rate of up to 500Hz for accurate and responsive control

03 **Convenient and easy to use**

Easy integration with the Crazyflie 2.1 drone with plug-and-play connectivity

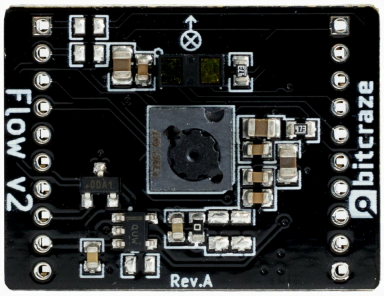

04 **Open Source**

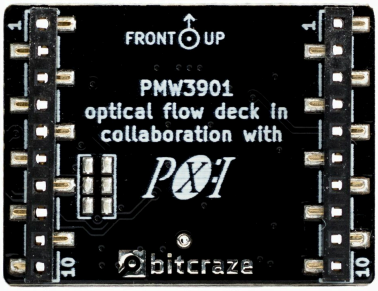

Open source software and firmware for customization and modification

05 **Small and flexible**

Compact and lightweight design for use in small indoor spaces

Product Gallery

Applications

- **Autonomous indoor flight research**
- **Indoor drone photography**
- **Designed for mounting under the Crazyflie 2.X**
