Overview

The Desktop 2 Heads Automatic SMT P&P Machine is a classic dual-head SMT pick-and-place system designed for high-precision mounting of a wide range of SMD components including 0402, 0603, SOP, and QFN. It features automatic vision with an HD industrial camera, intelligent remounting for uninterrupted operation, and a drawer-type integrated computer for easy maintenance.

Key Features

Description

If you would like to purchase or obtain more information about this item, please email us at: Manufacturing@chaihuo.org

-

· Desktop 2 Heads Automatic SMT P&P Machine is the classic of desktop dual-head SMT pick and placement machine. High precision, more reasonable mechanical design, easy operation, stable running, adapting air-operated feeder, automatic vision system, automatic detection materials shortage. Suitable for mounting most of the SMD components, such as 0402 0603 0805 1206 1210 3528 5050 SOP QFN, etc.

Product Features:

- Drawer type computer and driver integrated, could pull out lightly, convenient for later maintenance.
- Disassembled chassis, easy to handling.
- HD industrial camera, precisely identify 0402, 15*15mm and other electronic chips.
- Intelligent remounting design, when pick materials failed, software will instruct to continue mounting no-stop, record and unify remounting. It could improve the mounting efficiency .
- Component auxiliary box design, make components programming and position revising more precisely.
- Software is easy to understand and use, free upgrade permanently.
