INDUSTRIAL PRODUCT DATASHEET

Industrial-Grade Optical Rain Gauge RG-15 Rain Sensor

Industrial-Grade Optical Rain Gauge RG-15 Rain Sensor provides accurate, maintenance-free rain measurement with a rugged surface and easy installation for applications including smart agriculture, smart city, climate studies,...

SKU	UPDATED	PRICE

Overview

The Industrial-Grade Optical Rain Gauge RG-15 Rain Sensor features an industrial-grade design with a rugged surface for high reliability and accurate measurements, easy installation on weather station masts, buildings, and other infrastructures, and maintenance-free operation with no debris or clogging. It supports wide application scenarios including hydrological network monitoring, irrigation control, climate studies, smart agriculture, smart city, condensation and frost sensing, drop detection, and wiper control.

Key Features

01 **Industrial-grade design**

High reliability with a rugged surface, provides accurate measurements

02 **User friendly**

Can be easily installed on weather station masts, buildings, and other infrastructures

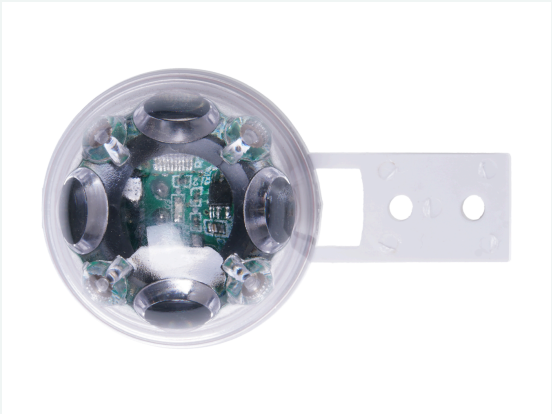

03 **Maintenance-free**

No debris would be generated and no clogging in the gauge

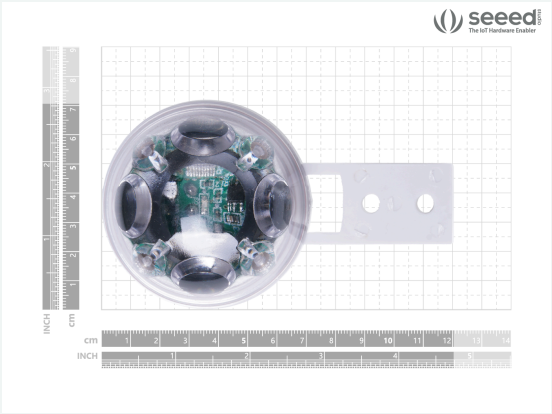

04 **Wide application scenarios**

Can be used in various scenarios like hydrological network monitoring, irrigation control, climate studies, etc.

Product Gallery

Applications

- Smart Agriculture
- Smart City
- Climate Studies
- Hydrological Network Monitoring
- Condensation and Frost Sensing
- Irrigation Control
- Drop Detection
- Wiper Control
