Overview

The SenseCAP PoE Injector is designed for routers that do not have the embedded PoE (Power on Ethernet) function and enables you to power and connect the PoE-enabled devices to the network over an Ethernet cable.

Key Features

01 **High-Speed Ethernet**

Supports 10/100/1000 Mbps High-Speed Ethernet

02 **Industrial Standard**

Wide working temperature from -10 to 50°C

03 **Low power consumption**

No-load consumption≤15W

04 **Safe and stable**

Overcurrent protection, Port, and SMPS Lightning Protection

05 **Globally Certified**

Obtained FCC, CE, and RoHS certifications

06 **Flexible Assembling**

Support wall mounted

Applications

- **LoRaWAN Gateway Network: Perfect for SenseCAP Series gateways, especially SenseCAP M1 and SenseCAP M2.**
- **Metro Optical Broadband Network: Data network operators such as telecommunications, cable TV, network system integration, etc.**
- **Broadband private network: Suitable for financial, government, oil, railway, electric power, public security, transportation, education, and other industries**
- **Multimedia transmission: Integrated transmission of images, voice, and data, suitable for remote teaching, conference TV, videophone, and other applications**
- **Real-time monitoring: Simultaneous transmission of real-time control signals, images, and data**
