Overview

[image] This MR60FDA2 Sensor Kit leverages 60GHz mmWave technology, offering reliable fall detection and human presence detection. Featuring light level sensing, an RGB LED for customizable interaction, and support for extended sensors/actuators, it provides next-level sensing for more responsive automation. With the XIAO ESP32C6 as the brain, the kit comes with pre-flashed ESPHome firmware and wireless connectivity via Wi-Fi. Thanks to the pre-flashed ESPHome firmware, this kit offers no-code plug-and-play integration with Home Assistant to customize detection zones, making it an ideal solution for healthcare monitoring, safety monitoring, elderly care, home automation, and more.

Key Features

01 **Feature 1**

Advanced mmWave Sensing for Fall and Human Presence Detection

02 **Human Static Presence**

Effective up to 6 meters.

03 **Fall Detection**

Detects within a 3x3x3 meter range, with a horizontal Field of View (FoV) of 120° and a vertical FoV of 100°.

04 **The above parameters have been tested in the empty deployment environments.***

05 **Feature 2**

Powered by ESP32 & ESPHome & No-Code Integration with Home Assistant

06 **Feature 3**

Ambient Light Sensing for Responsive Automation

07 **Feature 4**

Customizable Interaction

08 **Feature 5**

Extended Sensing or Automation with Grove

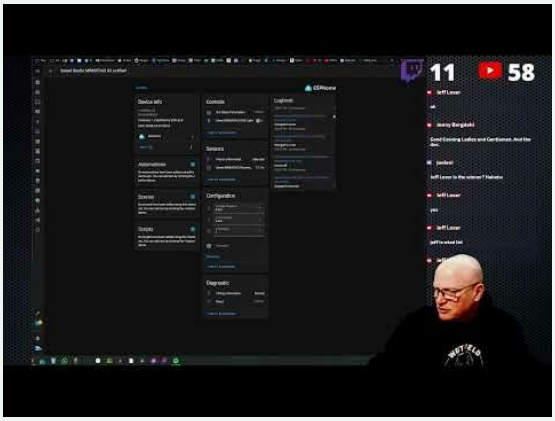

09 **Feature 6**

Open Source 3D Printed Enclosure

10 **Feature 7**

Open for Customization
