INDUSTRIAL PRODUCT DATASHEET

reComputer J3010B - Edge AI Computer with NVIDIA® Jetson™ Orin™ Nano 4GB

The reComputer J401B series is an iteration on reComputer Classic series.

SKU	UPDATED	PRICE
114993486	2026-11-11 09:36:06	$665.00(Excl. VAT)

Overview

The reComputer J401B series is an iteration on reComputer Classic series. The reComputer J3010B with NVIDIA Jetson Orin Nano 4GB modulesis a powerful and compact edge AI device with rich interfaces: 2x USB 3.2, HDMI, Ethernet, M.2 Key E for Wi-Fi module, M.2 Key M for SSD, mini-PCIe for LTE module, CAN, 40-pin and more.

Key Features

01 **Build the MostPowerful Embedded AI Platform**

02 **Design for Both Development and Production**

03 **Immediately Go-to-Market**

04 **Long Life Time Supply**

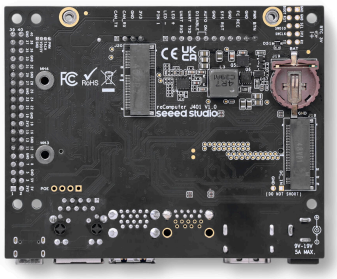

Product Gallery

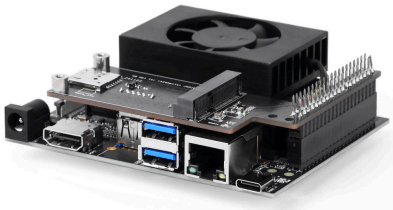

Note: LTE module is not included.

reComputer J40

Hardware Overview

Applications

- **Smart Lamppost:** Smart lampposts monitor traffic with sensors and transmit data for better traffic control. They integrate solar power, store energy for night use, and may feed excess power to the grid.
- **EV Battery Swapping/Charging System:** Battery swapping eases EV range anxiety. Charging stations, connected to the smart grid, optimize charging times. Some EVs can also supply power to the grid.
- **Smart Recycling Center:** Sensors in recycling bins reduce waste collection trips. Energy - efficient equipment runs during off - peak hours, and recycled materials are used for smart grid and EV components.
