Overview

This station is spec designed for charging T1000-A and T1000-B Card Trackers and supports charging up to 28 units at the same time. It features an integrated charging board and dedicated connection interfaces for each slot.Users no longer need to charge each tracker individually, as batch charging is supported to significantly improve overall charging efficiency.

Key Features

01 **NOTICE**

02 **The package includes both US and EU plugs.**

03 **Designed for Mass Deployment**

This charging station isdesigned for SenseCAP T1000-A/B Trackers and supports charging up to 28 devices simultaneously. Users no longer need to charge devices one by one, greatly improving efficiency and making it an excellent choice for batch deployment and centralized device maintenance.

04 **Simplified Connectivity**

Equipped with 28 unified 2-pin magnetic charging ports, the station allows quick and effortless device attachment. The magnetic design ensures accurate alignment, reduces wear from repeated use, and simplifies daily batch charging operations.

05 **Stable and Reliable Power System**

The station provides a stable 5V output with optimized power distribution, ensuring safe, balanced and reliable charging.
