Overview

The DC framework solenoid HCNE1-0416 is a 24-Volt DC one-way self-holding solenoid designed for applications such as vending machines, automatic door locks, and robots. It features a simple, reliable design with low friction, temperature stability, and a mute operation mechanism for long life and high efficiency.

Key Features

This 24-Volt DC One-way self-holding solenoid is great for projects! These types of solenoid are often used for automatic door locks,vending machines,robot etc. However, they work great for almost any project requiring a DC solenoid.

Features

- Easily fixed and connected
- Temperature stability, long product life and ensure good performance
- E ring and rubber gasket make the operation of the solenoid valve mute
- Low friction to ensure high efficiency and extend the life of
- Simple and reliable design

Application Ideas

- Vending machines, ticket vending machines,money exchange machine
- Office equipment: fax machines, punch card machines, copiers, typewriters, cash registers, plotters
- Transport equipment: automatic door locks, safety belt lock, automotive solenoid valve, parking facilities
- Appliances: tape recorder, video recorder, keyboard, automatic knitting machine, karaoke machine
- Other: packaging machine, robot, farming equipment, stamping equipment, alarm, water solenoid valve

Operating conditions

- Operation temperature: -5°C to 40°C , the solenoid valve will not solidification.
- Operating humidity: 45% to 85%, the solenoid valve will not solidification.
- Storage temperature: -40°C to 75°C in between, the solenoid valve will not solidification.
- Storage Humidity: 0% to 95%, the solenoid valve will not solidification.

Documents
