Overview

The 57 Step Motor Frame - Black is a mounting bracket designed to secure a 57 step motor, reducing the need for non-standard parts in non-standard equipment and small production. It features high strength from integrated steel plate manufacturing with welded reinforcement, precise dimensions via high-precision punched slots, and a durable black matt coating that resists wear and corrosion.

Key Features

Description
It is used to fix 57 step motor.we can reduce the non-standard parts processing when we make the Non-standard equipment and Small production of science and technology,It's Very convenient.

Feature:
1. **Strength** - It's made by using the steel plate a integrated manufacturing process，and welding reinforcement On both sides of it to ensure enough strength.
2. **Dimensions** - All the slot and hole are made by using a punching processing of high precision punch that ensure the dimensions accurate absolutely,so it can fit with machine accurately.
3. **Surface treatment** - Adopting advanced black matt coating that is the best feel,So it's not rub off and rust oxygen when it is used for a long time under the bad environment.
