Overview

This Hands-free Dispenser contains an Arduino and several Grove modules to help you modify your dispensers to make them work hands-free! This will protect you from germs and bacterias.

Key Features

01 Modify your current dispensers to work hands-free to prevent germs and bacterial contaminations

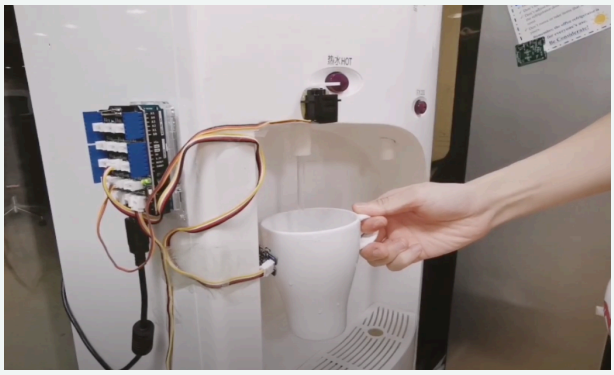

02 Dispense sanitizer, soap, and beverages by waving your hand or bringing in your cup

03 Powered by highly-sensitive Grove - IR Distance Interrupter with customizable detecting range for use with most dispensers

04 Easy-to-use modular Grove ecosystem accelerates hardware prototyping process

05 Seeeduino Lotus - Combination of an Arduino and a Grove Base Shield with built-in Grove Connectors

Product Gallery

Applications

- Hands-free Dispenser Modification for Sanitiser, Soap and Beverage Dispensers
- Grove Sensors for other projects
