# Overview

The CO2 levels monitoring and Airflow control system utilizes the Wio Terminal for real-time data visualization. It offers strong scalability and developability, with an SD card module for further analysis and WiFi module for cloud connectivity.

# Key Features

- Monitoring data visualization-real-time display on WioTerminal
- Very flexible, with strong scalability and developability
- Can be used for further analysis using inbuilt SD card module
- Can be connected to the Cloud services using the inbuilt Wifi module.
